ULTRA-RELIABLE PERFORMANCE
Dependable products are engineered for uninterrupted operation.

CUSTOM SOLUTIONS
Our extensive line of operators and accessories can be configured for almost any application.

COMPREHENSIVE SOLUTIONS
We offer comprehensive access solutions for almost any application.

THE BOTTOM LINE:
VALUE
Fully integrated system: LiftMaster’s full line of access solutions is tested to work together as a complete system.
Internalized product experience: Intuitive access management solutions and user-friendly products are simple and easy to use.
Ultra-reliable performance: Our operators offer best-in-class features designed to extend gate and hardware life.

COMPREHENSIVE SERVICE
LiftMaster® Authorized Dealers are expertly trained to service and maintain your perimeter solution.

SYSTEMATIC SAFETY
Beginning August 1, 2018, for a LiftMaster Side Gate Operator to function and meet UL® 325 requirements, the operator will require a minimum of 2 independent monitored safety entrapment protection devices for each entrapment zone: 2 in the open direction and 2 in the close direction (inherent reversing system counts as 1 device).*

Every installation is unique. It is the responsibility of the installer to ensure that all entrapment areas are protected with a minimum of 2 entrapment protection devices.

CUSTOM SOLUTIONS
Our extensive line of operators and accessories can be configured for almost any application.
